Privacy Policy

We have written this privacy policy (version 01.01.1970-121703271) to provide you with information in accordance with the requirements of the [General Data Protection Regulation \(EU\) 2016/679](#) as well as to explain what information we collect, how we use data and what choices you have as a visitor to this website.

Privacy policies usually sound very technical. However, this version should describe the most important things as simply and clearly as possible. Moreover, technical terms are explained in a reader-friendly manner whenever possible. We would also like to convey that we only collect and use information via this website if there is a corresponding legal basis for it. This is certainly not possible if you give very brief technical explanations, as are often standard on the Internet when it comes to data protection. We hope you find the following explanations interesting and informative. Maybe you will also find some information that you did not know yet.

Should you still have questions, we kindly ask you to follow the existing links to see further information on third-party websites, or to simply write us an email. You can find our contact information in our website's imprint.

Rights in accordance with the General Data Protection Regulation

You are granted the following rights in accordance with the provisions of the [GDPR](#) (General Data Protection Regulation) and the Austrian [Data Protection Act \(DSG\)](#):

- right to rectification (article 16 GDPR)
- right to erasure (“right to be forgotten“) (article 17 GDPR)
- right to restrict processing (article 18 GDPR)
- right to notification – notification obligation regarding rectification or erasure of personal data or restriction of processing (article 19 GDPR)
- right to data portability (article 20 GDPR)
- Right to object (article 21 GDPR)
- right not to be subject to a decision based solely on automated processing – including profiling – (article 22 GDPR)

If you think that the processing of your data violates the data protection law, or that your data protection rights have been infringed in any other way, you can lodge a complaint with your respective regulatory authority. For Austria this is the data protection authority, whose website you can access at <https://www.data-protection-authority.gv.at/>.

Google Fonts Local Privacy Policy

On our website we use Google Fonts, from the company Google Inc. (1600 Amphitheatre Parkway Mountain View, CA 94043, USA).

We integrated Google Fonts locally, so on our own webserver and not on Google’s servers. Hence, there is no connection to Google’s servers and consequently no data transfer or retention.

What are Google Fonts?

Google Fonts was previously called Google Web Fonts. It is an interactive list with over 800 fonts which [Google LLC](#) offer for free use. With the use of Google Fonts, it is possible to utilise fonts without uploading them to your own server. For that matter, in order to prevent any transfer of information to Google’s servers, we downloaded the fonts to our own server. This way we comply with the data privacy and do not transmit any data to Google Fonts.

Unlike other web fonts, Google offers us unrestricted access to all its fonts. Thus, we have a vast sea of font types at our disposal, which helps us to get the most out of our website. You can find out more answers and information on Google Fonts at <https://developers.google.com/fonts/faq?tid=121703271>.

Font Awesome Privacy Policy

On our website we use Font Awesome by the American company Fonticons (307 S. Main St., Suite 202, Bentonville, AR 72712, USA). Upon your visit to one of our websites, the Font Awesome web font, i.e. the icons, are loaded via the Font Awesome Content Delivery Network (CDN). This way texts, fonts and icons are displayed appropriately on every device. In this privacy policy we will go into more detail on data storage and data processing by this service.

What is Font Awesome?

Icons play an increasingly important role on websites. Font Awesome is a web font specifically designed for web designers and web developers. With Font Awesome icons can for example be scaled and coloured as desired using the CSS stylesheet language. Thus, they now replace old picture icons. Font Awesome CDN is the easiest way to load icons or fonts onto your website. To do this, we only had to embed a short line of code into our website.

Why do we use Font Awesome on our website?

Font Awesome enables our websites’ content to be depicted better. This eases your navigation on our website, and helps you grasp its content better. The icons can sometimes even be used to replace whole words and save space. This is particularly useful when optimising content specifically for smartphones. The icons are inserted as HTML code instead of as an image, which allows us to edit

the icons with CSS exactly as we want. Simultaneously, Font Awesome also lets us improve our loading speed, as it only contains HTML elements and no icon images. All these advantages help us to make our website even clearer, faster and more refined for you.

Which data are stored by Font Awesome?

The Font Awesome Content Delivery Network (CDN) is used to load icons and symbols. CDNs are networks of servers that are distributed around the world. They make it possible to quickly load files from locations in close proximity. When you open one of our pages, the respective icons will be provided by Font Awesome.

For the web fonts to be loaded, your browser has to connect to the servers of Fonticons, Inc. For this, your IP address will be identified. Font Awesome also collects data on which icon files are downloaded, as well as when they are downloaded. Furthermore, technical data such as your browser version, screen resolution or the time when you accessed the page are also transmitted.

These data are collected and stored for the following reasons:

- to optimise Content Delivery Networks
- to identify and fix technical errors
- to protect CDNs from misuse and attacks
- to calculate fees from Font Awesome Pro customers
- to identify the popularity of icons
- to establish which computer and software you are using

If your browser does not allow web fonts, one of your PC's standard fonts will be used automatically. Moreover, as far as we are currently aware, no cookies will be set. We are keeping in contact with Font Awesome's privacy department and will let you know as soon as we find out more.

How long and where are the data stored?

Font Awesome stores data about the use of the Content Delivery Network also on servers in the United States of America. However, the CDN servers are located all across the world and store user data in your proximity. The data is usually only stored for a few weeks in an identifiable form. Aggregated statistics on the use of the CDNs may also be stored for longer. However, these do not include any personal data.

How can I delete my data or prevent data retention?

As far as we are aware, Font Awesome does not store any personal data via Content Delivery Networks. If you do not want data about the used icons to be stored, you will unfortunately not be able to visit our website. If your browser does not allow web fonts, no data will be transmitted or saved. In this case your computer's default font will be used.

If you want to find out more about Font Awesome and their data handling, we recommend you to read their privacy policy at <https://fontawesome.com/privacy> along with the help page at <https://fontawesome.com/help>.

Embedded Social Media elements Privacy Policy

We have embedded elements from social media services on our website, to display pictures, videos and texts. By visiting pages that present such elements, data is transferred from your browser to the respective social media service, where it is stored. We do not have access to this data. The following links lead to the respective social media services' sites, where you can find a declaration on how they handle your data:

- Instagram Data Policy: <https://help.instagram.com/519522125107875>
- For YouTube, the Google Privacy Policy applies: <https://policies.google.com/privacy?hl=en-GB>
- Facebook Data Policy: <https://www.facebook.com/about/privacy>
- Twitter Privacy Policy: <https://twitter.com/en/privacy>

YouTube Privacy Policy

We have integrated YouTube videos to our website. Therefore, we can show you interesting videos directly on our site. YouTube is a video portal, which has been a subsidiary company of Google LLC since 2006. The video portal is operated by YouTube, LLC, 901 Cherry Ave., San Bruno, CA 94066, USA. When you visit a page on our website that contains an embedded YouTube video, your browser automatically connects to the servers of YouTube or Google. Thereby, certain data are transferred (depending on the settings). Google is responsible for YouTube's data processing and therefore Google's data protection applies.

In the following we will explain in more detail which data is processed, why we have integrated YouTube videos and how you can manage or clear your data.

What is YouTube?

On YouTube, users can watch, rate, comment or upload videos for free. Over the past few years, YouTube has become one of the most important social media channels worldwide. For us to be able to display videos on our website, YouTube provides a code snippet that we have integrated to our website.

Why do we use YouTube videos on our website?

YouTube is the video platform with the most visitors and best content. We strive to offer you the best possible user experience on our website, which of course includes interesting videos. With the help of our embedded videos, we can provide you other helpful content in addition to our texts and images. Additionally, embedded videos make it easier for our website to be found on the Google search engine. Moreover, if we place ads via Google Ads, Google only shows these ads to people who are interested in our offers, thanks to the collected data.

What data is stored by YouTube?

As soon as you visit one of our pages with an integrated YouTube, YouTube places at least one cookie that stores your IP address and our URL. If you are logged into your YouTube account, by using cookies YouTube can usually associate your interactions on our website with your profile. This includes data such as session duration, bounce rate, approximate location, technical information such as browser type, screen resolution or your Internet provider. Additional data can include contact details, potential ratings, shared content via social media or YouTube videos you added to your favourites.

If you are not logged in to a Google or YouTube account, Google stores data with a unique identifier linked to your device, browser or app. Thereby, e.g. your preferred language setting is maintained. However, many interaction data cannot be saved since less cookies are set.

In the following list we show you cookies that were placed in the browser during a test. On the one hand, we show cookies that were set without being logged into a YouTube account. On the other hand, we show you what cookies were placed while being logged in. We do not claim for this list to be exhaustive, as user data always depend on how you interact with YouTube.

Name: YSC

Value: b9-CV6ojl5Y121703271-1

Purpose: This cookie registers a unique ID to store statistics of the video that was viewed.
Expiry date: after end of session

Name: PREF

Value: f1=50000000

Purpose: This cookie also registers your unique ID. Google receives statistics via PREF on how you use YouTube videos on our website.

Expiry date: after 8 months

Name: GPS

Value: 1

Purpose: This cookie registers your unique ID on mobile devices to track GPS locations.

Expiry date: after 30 minutes

Name: VISITOR_INFO1_LIVE

Value: 95Chz8bagyU

Purpose: This cookie tries to estimate the user's internet bandwidth on our sites (that have built-in YouTube videos).

Expiry date: after 8 months

Further cookies that are placed when you are logged into your YouTube account:

Name: APISID

Value: zILlvCIZSkqGsSwl/AU1aZI6HY7121703271-

Purpose: This cookie is used to create a profile on your interests. This data is then used for personalised advertisements.

Expiry date: after 2 years

Name: CONSENT

Value: YES+AT.de+20150628-20-0

Purpose: The cookie stores the status of a user's consent to the use of various Google services. CONSENT also provides safety measures to protect users from unauthorised attacks.

Expiry date: after 19 years

Name: HSID

Value: AcRwpgUik9Dveht0I

Purpose: This cookie is used to create a profile on your interests. This data helps to display customised ads.

Expiry date: after 2 years

Name: LOGIN_INFO

Value: AFmmF2swRQIhALI6aL...

Purpose: This cookie stores information on your login data.

Expiry date: after 2 years

Name: SAPISID

Value: 7oaPxoG-pZsJuuF5/AnUdDUIsJ9iJz2vdM

Purpose: This cookie identifies your browser and device. It is used to create a profile on your interests.

Expiry date: after 2 years

Name: SID

Value: oQfNKjAsl121703271-

Purpose: This cookie stores your Google Account ID and your last login time, in a digitally signed and encrypted form.

Expiry date: after 2 years

Name: SIDCC

Value: AN0-TYuqub2JOcDTyL

Purpose: This cookie stores information on how you use the website and on what advertisements you may have seen before visiting our website.

Expiry date: after 3 months

How long and where is the data stored?

The data YouTube receive and process on you are stored on Google's servers. Most of these servers are in America. At <https://www.google.com/about/datacenters/inside/locations/?hl=en> you can see where Google's data centres are located. Your data is distributed across the servers. Therefore, the data can be retrieved quicker and is better protected against manipulation.

Google stores collected data for different periods of time. You can delete some data anytime, while other data are automatically deleted after a certain time, and still other data are stored by Google for a long time. Some data (such as elements on "My activity", photos, documents or products) that are saved in your Google account are stored until you delete them. Moreover, you can delete some data associated with your device, browser, or app, even if you are not signed into a Google Account.

How can I delete my data or prevent data retention?

Generally, you can delete data manually in your Google account. Furthermore, in 2019 an automatic deletion of location and activity data was introduced. Depending on what you decide on, it deletes stored information either after 3 or 18 months.

Regardless of whether you have a Google account or not, you can set your browser to delete or deactivate cookies placed by Google. These settings vary depending on the browser you use. The following instructions will show how to manage cookies in your browser:

[Chrome: Clear, enable and manage cookies in Chrome](#)

[Safari: Manage cookies and website data in Safari](#)

[Firefox: Clear cookies and site data in Firefox](#)

[Internet Explorer: Delete and manage cookies](#)

[Microsoft Edge: Delete cookies in Microsoft Edge](#)

If you generally do not want to allow any cookies, you can set your browser to always notify you when a cookie is about to be set. This will enable you to decide to either allow or permit each individual cookie. Since YouTube is a subsidiary company of Google, Google's privacy statement applies to both. If you want to learn more about how your data is handled, we recommend the privacy policy at <https://policies.google.com/privacy?hl=en>.
